

SARS-CoV-2 COVID-19

Serological confirmatory test for the detection of IgG antibodies against SARS-CoV-2

Line Immunoassay	Art.-No.	Determinations
recomLine SARS-CoV-2 IgG [Avidität] / RUO	7374	20

Use of different, recombinant SARS-CoV-2-specific antigens

- Nucleocapsid (NP) as well as RBD and S1 of the spike protein:
 - Very high immunogenicity
 - Application in most screening assays

Additional information thanks to

- Detection of antibodies against seasonal coronaviruses (HCoV)
- Possible avidity determination

Easy handling

- Identical processing as for other tests from the *recomLine* product line
- Manual to fully automated workflow and evaluation possible

Currently only for research purposes (RUO) – soon available as CE-IVD

The perfect addition to the screening tests in ELISA format

ELISA	Art.-No.	Determinations
recomWell SARS-CoV-2 IgG / CE-IVD	7304	96
recomWell SARS-CoV-2 IgA / CE-IVD	7305	96
